

Project Milestone 5

User Test Product Team Report

Group # 4

Andrew Denewellis, Anthony Frock, Galal Chamma, Sean Epley

Introduction

Our group designed and developed a website called CheckFlix. Many people want to watch television or movies but don't always have Netflix already or they do and they don't like the suggestion filtering or search algorithm of Netflix itself. Our website offers a simplified and free to use check for movies and television currently available on Netflix. This allows users to freely search for available movies or television shows without the hassle of subscribing or missing out on secret gems due to a filtered suggestion algorithm. Once a user finds some worthwhile entertainment, we have easy links to Netflix itself so they can watch or decide to subscribe.

User Tests

Group 3 tested our website using six different user stories that cover the primary functionality of CheckFlix. The following table shows the results and feedback from Group 3.

#	User Story	Test Results
1	As a User, I want to view a list of titles currently on Netflix under a specific genre.	Performed intuitively.
2	As a User, I want to be able to filter a list of titles in a specific genre so that I can view a smaller, more refined list of what I am looking for.	Performed intuitively.
3	As a User, I want to be able to search for specific titles so that I know if the movie / tv show I want is on Netflix or not.	Performed intuitively.
4	As a User, I want to be able to see a list of all the new additions to netflix this year	Tester performed the action after slight explanation. Button "New" wasn't as obvious as intended.
5	As a user, I want to be able to access the title I choose directly on Netflix, so I do not have to search for the title separately on Netflix.	Performed intuitively.
6	As a user, I want to filter titles displayed to only show movies with specified duration	Performed intuitively.

7	As a user, I want to filter titles displayed to only view series with a specified maturity rating	Performed intuitively.
8	As a user, I want to filter titles displayed to only view titles released in a chosen year range	Performed intuitively.
9	As a user, I want to be able to reset my chosen filters to default	Performed intuitively.
10	As a user, I want to easily access the homepage of the website from any current page I have loaded	Performed intuitively.

Conclusion

Out of the ten test cases, the testing team completed nine of the ten tasks intuitively. Test four required some explanation due to the button only saying “New” and it wasn’t as obvious to the tester as initially assumed. The testing team and course team offered feedback listed below we plan to either correct or implement moving forward.

Notes

- Sizing Issues regarding empty slots of listings
- Pages and counter for displaying titles
- Add search not found
- Add message letting user know if no results were found for that filter
- Add message letting user know how many results are displayed, maybe even how many pages are displayed alongside it
- Reset Button not updating checkboxes
- New additions as “Genre” box instead
- Fix filter button on New Addition page
- Center the genre cards on the home page
- Increase size of thumbnail title and make it different color
- **Streamline Genre to Genre. (important)**
- **Make “type” filter show up first. Once user chooses the type, the rest of the filter options should appear.(important)**
- Sort movies by year if a filter picked of 2010-now, or something like that
- Add a sort button to sort alphabetically or by year
- Add an “all genres” card
- Add extra genre cards (drama, crime, international)
- Add all titles card
